

# Pelican Network

## DX Trade Collection Sheet

### Phase 1

1

Server Environment URLs:

- Web Interface URL: (e.g., [https://\[broker-domain\].dx.trade/dxsca-web/](https://[broker-domain].dx.trade/dxsca-web/))
- REST API URL: (e.g., [https://\[broker-domain\].dx.trade/dxweb/rest/](https://[broker-domain].dx.trade/dxweb/rest/))
- WebSocket URL: (e.g., [wss://\[broker-domain\].dx.trade/dxsca-web/?format=json](wss://[broker-domain].dx.trade/dxsca-web/?format=json))

2

Administrative Credentials:

- Username & Password: A login with administrative permissions.
- Permissions Required:
  - "Trade on Behalf": To execute copy trades for users.
  - View Historical Values & Real-time Events: To generate performance statistics.

3

Domain:

The specific environment identifier (not to be confused with the public website domain name), which ensures the API connects to the correct broker instance.

4

Whitelisting (Standard Requirement):

20.107.155.157	40.69.20.76	20.107.154.178
20.107.157.24	40.69.20.97	143.244.39.168
20.107.157.50	88.98.234.27	185.220.205.16
40.127.209.69	20.107.153.206	151.80.243.5
40.69.20.122	20.67.207.72	151.80.243.6
40.69.20.73	20.107.158.155
